

CHALKY COLOR
The effects of the wind and sun create matte finishes and color gradations that result in a soothing, reassuring beauty.

TIME AND NATURE WORK HAND IN HAND to create a softened beauty that is restful and comforting. We experience it in the layered hues of mineral deposits, sea-buffed stones and the weathered shutters of a rustic farmhouse. The colors are chalky and earthy, the materials raw and organic, the finishes matte. It's a homespun aesthetic inspired by our renewed appreciation for artisan craft, handmade quality and homemaking as a valued skill rather than a chore.

HANDMADE
Handmade craftwork and earthy character come together in this sea urchin-inspired bowl by Heather Knight.

NATURAL TEXTURES
It's about furnishings you can feel with your eyes, like the big textures of this Biknit Chaise for Moroso by Patricia Urquiola.

THE MAGIC HOUR
The minutes after sunset and before dark are the most coveted by photographers; the light is softer, the shadows longer, bathing images in a warm glow.
