

**SEMPRECIIOUS**  
The colors of crystals and semiprecious stones exude glamour, but with a youthful, quirky twist.

WE FEEL PRETTY, OH, SO PRETTY, in a demure mid-century way — but with a new, modern edge. The retro glamour of pearls, florals and classic feminine silhouettes are tempered by fun and funky accents and attitude. The pastels are a bit bolder, including semiprecious gem tones like citrine, peridot and amethyst, set off by crisp neutrals. The look is still ladylike — but much more free-spirited than in your mother's day.

#### RETRO FUN

The original waif supermodel Twiggy revolutionized standards of beauty in 1966. Now a fresh take on her legendary look is appearing on the fashion scene.

#### FLIRTY AND FEMININE

Both are possible with the geometric prints and kaleidoscopic color of today's most fashionable fabrics.

#### A MOVE TO MOD

There's nothing more hip and elegant than a vintage Vespa that's spent just the right number of summers in the sun.
