

CONFLEX™

SherLastic® Elastomeric Coating

PRESERVE, PROTECT and ENHANCE
concrete and masonry surfaces.

REDUCE CALLBACKS WITH ECONOMICAL PROTECTION AGAINST WIND-DRIVEN RAIN.

ConFlex™ SherLastic® Elastomeric Coating is the economical choice for excellent protection from wind-driven rain and harsh weather conditions. Designed for use on vertical masonry and concrete surfaces, SherLastic covers and hides hairline cracks while helping prevent water from penetrating into building interiors. SherLastic is designed to not trap moisture vapor inside, reducing callbacks due to blistering.

With smooth application, SherLastic makes it fast and easy to achieve a uniform, pinhole-free finish, and with excellent efflorescence resistance, SherLastic maintains its freshly coated appearance and reduces white salt surface staining. It delivers an attractive, uniform finish and waterproof protection at a great value.

ConFlex SherLastic Key Benefits

<ul style="list-style-type: none"> • Flexible, 100% acrylic elastomeric formula helps bridge hairline cracks and minimizes pinholes. Meets a wide range of job specifications. 	<ul style="list-style-type: none"> • Meets the most stringent VOC regulations.
<ul style="list-style-type: none"> • Reduces water damage on interior surfaces by protecting exterior concrete and masonry surfaces against wind-driven rain. 	<ul style="list-style-type: none"> • Available in a wide range of colors and is tintable, allowing fast turnaround on custom colors.
<ul style="list-style-type: none"> • Resists alkali and efflorescence when used as a topcoat over Loxon® Masonry Conditioner or Loxon® Concrete & Masonry Primer/Sealer. 	<ul style="list-style-type: none"> • Use SherLastic on all types of commercial and residential new and existing masonry construction and repaints, including stucco, poured-in-place concrete and pre-cast concrete. Apply by spray, brush or roll.
