

LOXON[®]

Acrylic Block Surfacer

Innovative, 100% acrylic foundation coat **RESISTS** alkali and applies easily for a smooth finish.

EXCEPTIONAL LEVELING, EFFICIENCY AND PERFORMANCE.

Tight production schedules, freshly cured mortar and unpredictable weather conditions can make it challenging to prepare block walls for the topcoat. Loxon® Acrylic Block Surfacers reduce these concerns with fast application, high pH tolerance, and reliable drying down to 35°F. Its innovative, 100% acrylic latex resin formula is engineered to provide exceptional leveling characteristics for a dense, uniform finish on any conventional CMU

construction. Dramatically smoothing the rough profiles of interior and exterior masonry, concrete and block surfaces, Loxon Acrylic Block Surfacers effectively fill pores, voids and pinholes — often in one pass. It speeds production without sacrificing the consistent appearance and performance your projects demand and helps reduce topcoat consumption. Loxon Acrylic Block Surfacers deliver maximum time, material and labor savings.

Loxon Acrylic Block Surfacers Key Benefits

<ul style="list-style-type: none"> • 100% acrylic latex resin formulation resists alkali burn, delamination and other defects associated with green mortar. 	<ul style="list-style-type: none"> • Compatible with a wide range of topcoats, including high-performance epoxies and urethanes.
<ul style="list-style-type: none"> • Enhanced leveling properties form a smooth, pinhole-free base coat. 	<ul style="list-style-type: none"> • Ideal for interior/exterior masonry, concrete and block surfaces. Suitable for use in USDA-inspected facilities.
<ul style="list-style-type: none"> • Easy, fast application by brush, roll and spray at temperatures down to 35°F. 	<ul style="list-style-type: none"> • Helps reduce topcoat consumption.
