

**SHERWIN-WILLIAMS®**

Get tough, flexible  
protection with  
**Pro Industrial™**  
**Pre-Catalyzed**  
**Waterbased Urethane**

**Pro Industrial™ Pre-Catalyzed Waterbased Urethane** has comparable performance to a two-part waterbased urethane with the ease of a single-component product.

**Easy application**

**Single-component product**

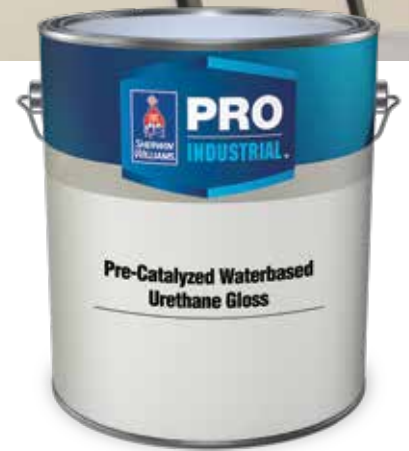

**Excellent UV resistance**

Open your smartphone camera and scan over the code to learn more about the benefits of Pro Industrial™ Pre-Catalyzed Waterbased Urethane. ►

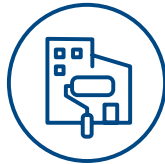

***Pro Industrial™ Pre-Catalyzed Waterbased Urethane*** offers protection tough enough for many commercial and light industrial projects.

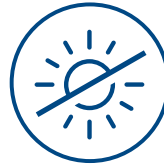

**Enjoy Easy Application and Cleanup**

Single-component convenience with performance comparable to a 2-part waterbased urethane.

**Use in Versatile Applications**

Ideal for water and petrochemical tanks, power plants, amusement parks and general exterior coatings.

**Provide Excellent UV Resistance**

Beautiful color and gloss finish retains a sleek, fresh look far longer than standard alkyd urethanes.

**Meet the Most Stringent VOC Requirements**

Fewer than 100 g/L VOC.

***Pro Industrial: Setting the standard for high-performance coatings.*** When performance and appearance matter, trust the time-proven line of Pro Industrial coatings from Sherwin-Williams. These innovative technologies are engineered to withstand high traffic and demanding conditions, making them ideal for busy commercial and institutional environments. Pro Industrial is truly the professional's choice when performance is critical.
