HEAVY DUTY SUPERTUFF TACK BACK

HIGHLY ABSORBENT LEAK RESISTANT PROTECTION

SuperTuff Tack Back gives you superior leak resistant protection that stays where you place it. The roll consists of two layers—absorbent fiber made from a blend of post-consumer and post-industrial recycled PET and a PET film with an aqueous pressure sensitive adhesive. The tacky backing allows for protection of vertical and horizontal surfaces. Plus, it's easy to use and remove. This heavy duty surface protector can stand up to forklifts and high traffic for an extended period of time, and is ideal for a walk off mat to prevent tracking. Reduce messy clean ups by protecting your jobsite with SuperTuff Tack Back.
