ENHANCE LARGE CONCRETE STRUCTURES WITH LONG-LASTING BEAUTY AND DURABILITY.

LOXON®
VERTICAL CONCRETE STAIN

ENHANCE LARGE CONCRETE STRUCTURES WITH LONG-LASTING BEAUTY AND DURABILITY.
Loxon Vertical Concrete Stain is designed to deliver an attractive finish on pre-cast tilt-up concrete, above-grade concrete walls and smooth or textured concrete walls. It hides surface imperfections and penetrates deeply for tough protection that resists peeling and flaking. Its innovative formula both repels water and allows moisture vapor transfer for early blister resistance. Loxon Vertical Concrete Stain adheres to new and old concrete, resists running and sagging and has minimal overspray. Because it sprays easily onto concrete and dries fast, you can recoat in as little as 15 minutes. It features excellent efflorescence and good UV resistance to guard against color fading. Tintable to a wide range of colors, Loxon Vertical Concrete Stain provides outstanding color uniformity and long-lasting performance and beauty for years to come.

**LOXON VERTICAL CONCRETE STAIN KEY BENEFITS**

- Combines tough protection against the elements with an aesthetically pleasing, smooth flat finish for all-around performance and beauty.
- Acts as a water repellant on nonporous concrete surfaces and also allows moisture vapor transfer to resist early blistering and failures.
- Ideal for block and stucco walls, CMU, split face and fluted block, precast, poured-in-place and tilt-up concrete, including parking garages, stadium supports, bridge columns and DOT sound barriers.
- Masks surface irregularities, penetrating deeply into the surface for a consistent finish with no peeling or flaking.
- Excellent color uniformity during application and good UV and excellent efflorescence resistance for an attractive appearance.
- Simple, fast application, with 15 minutes drying and recoating time and easy soap and water cleanup.

**LOXON VERTICAL CONCRETE STAIN IS BROUGHT TO YOU BY A NAME YOU KNOW AND TRUST.**
