This Painting Schedule is furnished only as a guide to select exterior paint systems, and is not all-inclusive of available Sherwin-Williams products. Although it is written in the CSI format and can be included in its entirety in a master specification, one should review the contents and edit to suit the particular needs of the project and its respective location. This specification does not take into consideration wet areas or areas needing high performance coatings.

The schedule is arranged by substrates, and offers latex, & alkyd systems. For High Performance Industrial Coatings refer to 09 96 00. Each system also includes the various degrees of gloss available. Architectural and Industrial products are specified in this document.

Local and National V.O.C. (Volatile Organic Compound) regulations have been taken into consideration, but because these regulations vary greatly around the country and are constantly changing, we suggest verifying that product selections meet the requirements of the area in which they are to be used. If the project is located within the OTC, CARB, SCAQMD or other VOC regulated regions; one must comply with the regulations regarding VOCs. It is always recommended that you consult with a Sherwin-Williams Company Representative or call our Sherwin-Williams Architectural Services Department before finalizing the selection.

If you need more specific information on a particular product, refer to the current Sherwin-Williams Painting Systems Catalog or the www.sherwin-williams.com website, or call our Architectural Services Department toll free.

SECTION 09 91 13

EXTERIOR COMMERCIAL PAINTS AND COATINGS

Part 1 GENERAL

1.1 SECTION INCLUDES

A Exterior paint and coating systems

1.2 RELATED SECTIONS

A Section 05 05 13 - Shop Applied Coatings for Metal
B Section 06 01 40 - Architectural Woodwork Refinishing
C Section 06 05 83 - Shop Applied Wood Coatings
D Section 07 19 00 - Water Repellents
E Section 09 67 00 - Fluid Applied Flooring for Concrete
F Section 09 93 00 - Stains and Transparent Finishes
G Section 09 96 00 - High-Performance Coatings

1.3 REFERENCES

A SSPC-SP 1 - Solvent Cleaning
B SSPC-SP 2 - Hand Tool Cleaning
C SSPC-SP 3 - Power Tool Cleaning
D SSPC-SP 13 / NACE No. 6 Surface Preparation for Concrete
1.4 SUBMITTALS

A Submit under provisions of Section 01 33 00, Submittal Procedures.

B Product Data: Manufacturer's data sheets on each paint and coating product should include:
   1. Product characteristics
   2. Surface preparation instructions and recommendations
   3. Primer requirements and finish specification
   4. Storage and handling requirements and recommendations
   5. Application methods
   6. Clean-up Information

C Selection Samples: Submit a complete set of color chips that represent the full range of manufacturer's color samples available.

D Coating Maintenance Manual: upon conclusion of the project, the Contractor or paint manufacturer/supplier shall furnish a coating maintenance manual, such as Sherwin-Williams "Custodian Paint Maintenance Manual" report or equal. Manual shall include an Area Summary with finish schedule, Area Detail designating where each product/color/finish was used, product data pages, Safety Data Sheets, care and cleaning instructions, touch-up procedures, and color samples of each color and finish used.

1.5 MOCK-UP

Include a mock-up if the project size and/or quality warrant taking such a precaution. The following is one example of how a mock-up on a large project might be specified. When deciding on the extent of the mock-up, consider all the major different types of painting on the project.

A. Finish surfaces for verification of products, colors, & sheens.
B. Finish area designated by Architect.
C. Provide samples that designate prime & finish coats.
D. Do not proceed with remaining work until the Architect approves the mock-up samples.

1.6 DELIVERY, STORAGE, AND HANDLING

A Delivery: Deliver manufacturer's unopened containers to the work site. Packaging shall bear the manufacturer's name, label, and the following list of information:
   1. Product name, and type (description)
   2. Application & use instructions
   3. Surface preparation
   4. VOC content
   5. Environmental handling and SDS
   6. Batch date
   7. Color number

B Storage: Store and dispose of solvent-based materials, and materials used with solvent-based materials, in accordance with requirements of local authorities having jurisdiction. Store materials in an area that is within the acceptable temperature range, per manufacturer's instructions. Protect from freezing.

C Handling: Maintain a clean, dry storage area to prevent contamination or damage to the coatings.
1.7 PROJECT CONDITIONS

Maintain environmental conditions (temperature, humidity, and ventilation) within limits recommended by manufacturer for optimum results. Do not apply coatings under environmental conditions outside manufacturer's absolute limits.

Part 2 PRODUCTS

2.1 MANUFACTURERS

A Acceptable Manufacturer:
The Sherwin-Williams Company
101 Prospect Avenue NW
Cleveland, OH 44115
Tel: (800) 321-8194
www.sherwin-williams.com

B Substitutions: Requests for substitutions will be considered in accordance with provisions of Section 01 60 00 Product Requirements.
When submitting request for substitution, provide complete product data specified above under Submittals, for each substitute product.

2.2 APPLICATIONS/SCOPE

A Use this article to define the scope of painting if not fully defined in a Finish Schedule or on the drawings. This article must be carefully edited to reflect the surfaces actually found on the project. In some cases, it may be enough to use the first paragraph that says, in effect, "paint everything" along with a list of items not to paint, without exhaustively defining all the different surfaces and items that must be painted.

B If the project involves repainting some but not all existing painted surfaces, be sure to indicate the extent of the repainting.

C The descriptions of each system can also be used to further refine the definition of what is to be painted, stained, or clear finished.

D Surfaces to Be Coated:

- Concrete: Cementitious Siding, Flexboard, Transite, and Shingles (Non-Roof)
- Masonry: Concrete Masonry Units, Cinder or Concrete Block
- Concrete: Concrete Floors, Patios, Porches, Steps & Platforms (Non-Vehicular)
- Metal: Aluminum/Galvanized
- Metal Ferrous: Misc. Iron, Ornamental Iron
- Wood: Decks, Floors, and Platforms (Non-Vehicular)
- Wood: Siding, Trim, Shutters, Sash, and Misc. Hardboard
- Architectural PVC, Plastic, Fiberglass
- Vinyl: Siding, EIFS, Synthetic Stucco
- Drywall: Gypsum Board, and Exterior Drywall
2.3 SCHEDULE INDEX - EXTERIOR SURFACES (NORMAL EXPOSURE)

A. CONCRETE - (Cementitious Siding, Flexboard, Transite Board, Shingles (Non-Roof)
Common Brick, Stucco, Tilt-up, Precast, and Poured-in-place Cement)) ..........Pages 6-8
   1. Latex Systems
   2. Elastomeric Systems
   3. Textured Elastomeric Systems
   4. Textured & Smooth Systems
   5. Stain System
   6. Clear Water Repellant

B. MASONRY - (Concrete Masonry Units, Cinder or Concrete Block) ..............Pages 9-11
   1. Latex Systems
   2. Elastomeric Systems
   3. Textured Elastomeric System
   4. Textured & Smooth Systems
   5. Stain Systems
   6. Clear Water Repellant

C. CONCRETE – ........................................................................................................ Page 11
   (Concrete Floors, Patios, Porches, Steps & Platforms (Non-Vehicular))
   1. Acrylic Water-Based Systems
   2. Solid Color Stain

D. METAL – (Aluminum, Galvanized) .................................................................Pages 12-13
   1. Latex Systems
   2. Alkyd Systems (Waterbased Urethane Modified Alkyd)

E. METAL – Ferrous (Structural Steel, Beams, Miscellaneous & Ornamental Iron, Sashes,
Doors, Partitions, Trim).........................................................................................Page 14
   1. Latex Systems
   2. Alkyd Systems (Waterbased Urethane Modified Alkyd)

F. WOOD – (Decks, Floors, Platforms, (Non-Vehicular)) ......................................Page 15
   1. Acrylic System
   2. Stain Systems

G. WOOD - (Siding, Trim, Shutters, Sashes, Misc., Hardboard-Bare/Primed) ...... Page 16-17
   1. Latex Systems
   2. Stain - Water Reducible Systems

H. ARCHITECTURAL PVC, PLASTIC, FIBERGLASS ........................................Page 18
   1. Latex Systems

I. VINYL SIDING, EIFS, SYNTHETIC STUCCO ..............................................Page 19
   1. Latex Systems

J. DRYWALL - (Gypsum Board, Exterior Drywall) .............................................Page 20

Index of Data pages

DATAPAGES AND SDS SHEETS: (To open any of the Data page Files, please click here)

Refer to the current SDS/EDS for specific VOCs. VOCs may vary by base and sheen.

**NOTES TO SPECIFIER**

- Specify the Pro Industrial line when higher performance is needed.
- Loxon Self-Cleaning Acrylic Coating is formulated to be self-cleaning by shedding dirt upon rain or water contact.
- Rusty galvanizing requires a minimum of Hand Tool Cleaning per SSPC-SP2, prime the area the same day as cleaned with Pro Industrial Pro-Cryl Universal Primer, B66-1300 Series
- For higher performance on bare ferrous and non-ferrous handrails and touch objects specify at minimum an epoxy primer followed by a urethane finish.
2.3 SCHEDULE

A. CONCRETE - (Cementitious Siding, Flexboard, Transite Board, Shingles (Non-Roof), Common Brick, Stucco, Tilt-up, Precast, and Poured-in-place Cement)

1. Latex Systems
   a. Gloss Finish
      1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
      2nd Coat: S-W A-100 Exterior Latex Gloss, A8 Series
      3rd Coat: S-W A-100 Exterior Latex Gloss, A8 Series
                (4.0 mils wet, 1.4 mils dry per coat)

   b. Satin Finish
      1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
      2nd Coat: S-W Resilience Latex Satin, K43 Series
      3rd Coat: S-W Resilience Latex Satin, K43 Series
                (4.0 mils wet, 1.6 mils dry per coat)

   c. Low Sheen Finish
      1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
      2nd Coat: S-W A-100 Exterior Latex Low Sheen, A12 Series
      3rd Coat: S-W A-100 Exterior Latex Low Sheen, A12 Series
                (4.0 mils wet, 1.5 mils dry per coat)

   d. Flat Finish
      1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
      2nd Coat: S-W A-100 Exterior Latex Flat, A6 Series
      3rd Coat: S-W A-100 Exterior Latex Flat, A6 Series
                (4.0 mils wet, 1.4 mils dry per coat)

   Early Moisture Resistant Finish
   1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
   2nd Coat: S-W Resilience Latex Gloss, K44 Series
   3rd Coat: S-W Resilience Latex Gloss, K44 Series
                (4.0 mils wet, 1.6 mils dry per coat)

   Early Moisture Resistant Finish
   1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
   2nd Coat: S-W Resilience Latex Satin, K43 Series
   3rd Coat: S-W Resilience Latex Satin, K43 Series
                (4.0 mils wet, 1.6 mils dry per coat)

   Early Moisture Resistant Finish
   1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
   2nd Coat: S-W Resilience Latex Satin, K43 Series
   3rd Coat: S-W Resilience Latex Satin, K43 Series
                (4.0 mils wet, 1.6 mils dry per coat)

   Low Sheen Finish
   1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
   2nd Coat: S-W A-100 Exterior Latex Low Sheen, A12 Series
   3rd Coat: S-W A-100 Exterior Latex Low Sheen, A12 Series
                (4.0 mils wet, 1.5 mils dry per coat)

   Flat Finish
   1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
   2nd Coat: S-W A-100 Exterior Latex Flat, A6 Series
   3rd Coat: S-W A-100 Exterior Latex Flat, A6 Series
                (4.0 mils wet, 1.4 mils dry per coat)

   Self-Cleaning Acrylic Finish
   1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                (8.0 mils wet, 3.2 dry)
   2nd Coat: S-W Loxon Self-Cleaning Acrylic, LX13 Series
   3rd Coat: S-W Loxon Self-Cleaning Acrylic, LX13 Series
                (5.0-7.0 mils wet, 2.1-2.9 mils dry per coat)

Specified Note: Loxon Self-Cleaning Acrylic Coating is formulated to be self-cleaning by shedding dirt upon rain or water contact.
A. CONCRETE - (Cementitious Siding, Flexboard, Transite Board, Shingles (Non-Roof), Common Brick, Stucco, Tilt-up, Precast, and Poured-in-place Cement) (Cont.)

1. Latex Systems
   d. Flat Finish (cont.)
      **Early Moisture Resistant Finish**
      1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                 (8.0 mils wet, 3.2 mils dry)
      2nd Coat: S-W Resilience Latex Flat, K42 Series
      3rd Coat: S-W Resilience Latex Flat, K42 Series
                 (4.0 mils wet, 1.6 mils dry per coat)

      **High Build Coating**
      1st Coat: S-W Loxon XP™, LX11 Series
                 (14.0-18.0 mils wet; 6.5-8.4 mils dry per coat)

2. Elastomeric Systems (Not Including; Cementitious Siding, Flexboard, Transite Board, Shingles (Non-Roof))
   a. Flat Finish
      1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                 (8.0 mils wet, 3.2 mils dry)
      2nd Coat: S-W ConFlex XL Elastomeric High Build Coating, CF11 Series
      3rd Coat: S-W ConFlex XL Elastomeric High Build Coating, CF11 Series
                 (13.0-16.0 mils wet, 6-7.5 mils dry per coat)

   **Alternate:**
   1st Coat: S-W Loxon Acrylic Block Surfacer, LX01 Series
                 (50-100 sq ft/gal)
   2nd Coat: S-W ConFlex SherLastic® Elastomeric Coating, CF16 Series
   3rd Coat: S-W ConFlex SherLastic Elastomeric Coating, CF16 Series
                 (10.0-14.0 mils wet, 4.0-6.0 mils dry per coat)

**Specifier Note:** For porous surfaces a coat of Loxon Acrylic Block Surfacer may be required to help achieve a pinhole free surface.

3. Textured Elastomeric Systems
   a. Textured Finish
      1st Coat: S-W Loxon Concrete & Masonry Primer, LX02 Series
                 (8.0 mils wet, 3.2 mils dry)
      2nd Coat: S-W ConFlex XL Elastomeric High Build Coating, CF11 Series
                 (13.0-16.0 mils wet, 6-7.5 mils dry per coat)
      3rd Coat: S-W ConFlex XL Textured Elastomeric High Build Coating, CF12 Series
                 (Fine, Medium, Extra Coarse) (70-80 sq ft/gal)

   **Alternate:**
   1st Coat: S-W Loxon Acrylic Block Surfacer, LX01 Series
                 (50-100 sq ft/gal)
   2nd Coat: S-W ConFlex SherLastic Elastomeric Coating, CF16 Series
   3rd Coat: S-W ConFlex SherLastic Elastomeric Coating, CF16 Series
                 (10.0-14.0 mils wet, 4.0-6.0 mils dry per coat)
A. CONCRETE - (Cementitious Siding, Flexboard, Transite Board, Shingles (Non-Roof), Common Brick, Stucco, Tilt-up, Precast, and Poured-in-place Cement) (Cont.)

4. Textured & Smooth Systems
   a. Textured (Waterbased Finish)
      1st Coat: S-W Loxon Acrylic Block Surfacer, LX01 Series
               (50-100 sq ft/gal)
      2nd Coat: S-W ConFlex UltraCrete™ Texture Coating, CF17 Series
               (Fine, Medium, Extra Coarse) (50-80 sq ft/gal)
   b. Textured (Solvent Based Finish)
      1st Coat: S-W ConFlex UltraCrete Solvent Borne Texture Coating, CF18 Series
               (Smooth) (100-160 sq ft/gal)
      2nd Coat: S-W ConFlex UltraCrete Solvent Borne Texture Coating, CF18 Series
               (Smooth, Fine, Medium) (50-80 sq ft/gal)
   c. Smooth (Waterbased Finish)
      1st Coat: S-W Loxon XP, LX11 Series
      2nd Coat: S-W Loxon XP, LX11 Series
               (14.0-18 mils wet, 6.5-8.4 mils dry per coat) 2nd coat optional

5. Stain Systems
   a. Solid Color Waterborne Finish
      1st Coat: S-W Loxon Vertical Concrete Stain, LX31W Series
      2nd Coat: S-W Loxon Vertical Concrete Stain, LX31W Series
               (50-250 sq/ft gal)
      Alternate:
      1st Coat: S-W H&C® COLORTOP™ Water-Based Solid Color Concrete Stain
      2nd Coat: S-W H&C COLORTOP Water-Based Solid Color Concrete Stain
               (50-300 sq ft/gal)
   b. Semi-Transparent Waterborne Finish
      1st Coat: S-W Loxon Vertical Semi-Transparent Concrete Stain, LX31T Series
      2nd Coat: S-W Loxon Vertical Semi-Transparent Concrete Stain, LX31T Series
               (150-400 sq ft/gal)

6. Clear Water Repellent
   a. Clear Waterborne
      1st Coat: S-W ConFlex Water Repellent 7% Siloxane, CF31 Series
      2nd Coat: S-W ConFlex Water Repellent 7% Siloxane, CF31 Series
               (25-200 sq ft/ gal)
   b. Clear Solventborne
      1st Coat: S-W Loxon 40% Silane Water Repellent, LX31T Series
      2nd Coat: S-W Loxon 40% Silane Water Repellent, LX31T Series
               (25-175 sq ft/ gal)
B. MASONRY (Concrete Masonry Units, Cinder or Concrete Block)

1. Latex Systems

a. Gloss Finish
1st Coat: S-W ConFlex Block Filler, CF01 Series (75-100 sq ft/gal)
2nd Coat: S-W A-100 Exterior Latex Gloss, A8 Series
3rd Coat: S-W A-100 Exterior Latex Gloss, A8 Series (4.0 mils wet, 1.4 mils dry per coat)

Early Moisture Resistant Finish
1st Coat: S-W ConFlex Block Filler, CF01 Series (75-100 sq ft/gal)
2nd Coat: S-W Resilience Latex Gloss, K44 Series
3rd Coat: S-W Resilience Latex Gloss, K44 Series (4.0 mils wet, 1.6 mils dry per coat)

b. Semi-Gloss Finish
1st Coat: S-W ConFlex Block Filler, CF01 Series (75-100 sq ft/gal)
2nd Coat: S-W Solo® Acrylic Semi-Gloss, A76 Series
3rd Coat: S-W Solo Acrylic Semi-Gloss, A76 Series (4.0 mils wet, 1.5 mils dry per coat)

c. Satin Finish
1st Coat: S-W ConFlex Block Filler, CF01 Series (75-100 sq ft/gal)
2nd Coat: S-W A-100 Exterior Latex Satin, A82 Series
3rd Coat: S-W A-100 Exterior Latex Satin, A82 Series (4.0 mils wet, 1.5 mils dry per coat)

Early Moisture Resistant Finish
1st Coat: S-W ConFlex Block Filler, CF01 Series (75-100 sq ft/gal)
2nd Coat: S-W Resilience Latex Satin, K43 Series
3rd Coat: S-W Resilience Latex Satin, K43 Series (4.0 mils wet, 1.6 mils dry per coat)

d. Low Sheen Finish
1st Coat: S-W ConFlex Block Filler, CF01 Series (75-100 sq ft/gal)
2nd Coat: S-W A-100 Exterior Latex Low Sheen, A12 Series
3rd Coat: S-W A-100 Exterior Latex Low Sheen, A12 Series (4.0 mils wet, 1.5 mils dry per coat)

e. Flat Finish
1st Coat: S-W ConFlex Block Filler, CF01 Series (75-100 sq ft/gal)
2nd Coat: S-W A-100 Exterior Latex Flat, A6 Series
3rd Coat: S-W A-100 Exterior Latex Flat, A6 Series (4.0 mils wet, 1.4 mils dry per coat)

Self-Cleaning Acrylic Finish
1st Coat: S-W Loxon Acrylic Block Surfacer, LX01 Series (50-100 sq ft/gal)
2nd Coat: S-W Loxon Self-Cleaning Acrylic, LX13 Series
3rd Coat: S-W Loxon Self-Cleaning Acrylic, LX13 Series (5.0-7.0 mils wet, 2.1-2.9 mils dry per coat)
B. MASONRY (Concrete Masonry Units, Cinder or Concrete Block) (Cont.)

1. Latex Systems
   
e. Flat Finish (cont.)
      
      **Early Moisture Resistant Finish**
      1st Coat: S-W ConFlex Block Filler, CF01 Series
                 (75-100 sq ft/gal)
      2nd Coat: S-W Resilience Latex Flat, K42 Series
      3rd Coat: S-W Resilience Latex Flat, K42 Series
                 (4.0 mils wet, 1.6 mils dry per coat)

      **High Build Coating**
      1st Coat: S-W Loxon Acrylic Block Surfacer, LX01 Series
                  (50-100 sq ft/gal)
      2nd Coat: S-W Loxon XP, LX11 Series
                 (14.0-18.0 mils wet, 6.5-8.4 mils dry)

2. Elastomeric Systems
   
a. Flat Finish
      1st Coat: S-W Loxon Acrylic Block Surfacer, LX01 Series
                (50-100 sq ft/gal)
      2nd Coat: S-W ConFlex XL Elastomeric High Build Coating, CF11 Series
                (13.0-16.0 mils wet, 6-7.5 mils dry per coat)
      3rd Coat: S-W ConFlex Sherlastic Elastomeric Coating, CF16 Series
                 (10.0-14.0 mils wet, 4.0-6.0 mils dry per coat)

   **Alternate:**
      1st Coat: S-W Loxon Acrylic Block Surfacer, LX01 Series
                (50-100 sq ft/gal)
      2nd Coat: S-W ConFlex Sherlastic Elastomeric Coating, CF16 Series
                (10.0-14.0 mils wet, 4.0-6.0 mils dry per coat)

3. Textured Elastomeric System
   
a. Textured Finish
      1st Coat: S-W Loxon Acrylic Block Surfacer, LX01 Series
                 (50-100 sq ft/gal)
      2nd Coat: S-W ConFlex XL Elastomeric High Build Coating, CF11 Series
                 (13.0-16.0 mils wet, 6-7.5 mils dry per coat)
      3rd Coat: S-W ConFlex XL Textured Elastomeric High Build Coating, CF12 Series
                 (Fine, Medium, Extra Coarse) (70-80 sq ft/gal)

4. Textured & Smooth Masonry Systems
   
a. Textured (Water Based Finish)
      1st Coat: S-W Loxon Acrylic Block Surfacer, LX01 Series
                 (50-100 sq ft/gal)
      2nd Coat: S-W ConFlex UltraCrete Textured Coating, CF17 Series
                 (Fine, Medium, Extra Coarse) (50-80 sq ft/gal)

   b. Textured Finish (Solvent Based)
      1st Coat: S-W ConFlex UltraCrete Solvent Borne Texture Coating, CF18 Series
                 (Smooth) (100-160 sq ft/gal)
      2nd Coat: S-W ConFlex UltraCrete Solvent Borne Texture Coating, CF18 Series
                 (Smooth, Fine, Medium) (50-80 sq ft/gal)

   c. Smooth (Water Based Finish)
      1st Coat: S-W Loxon XP, LX11 Series
      2nd Coat: S-W Loxon XP, LX11 Series
                 (14.0-18 mils wet, 6.5-8.4 mils dry per coat) 2nd coat optional
B. MASONRY (Concrete Masonry Units, Cinder or Concrete Block) (Cont.)

5. Stain Systems

a. Solid Color Waterborne Finish
   1st Coat: S-W Loxon Vertical Concrete Stain, LX31W Series
   2nd Coat: S-W Loxon Vertical Concrete Stain, LX31W Series
   (50-250 sq ft/gal)

b. Semi-Transparent Waterborne Finish
   1st Coat: S-W Loxon Vertical Semi-Transparent Concrete Stain, LX31T Series
   2nd Coat: S-W Loxon Vertical Semi-Transparent Concrete Stain, LX31T Series
   (150-400 sq ft/gal)

6. Clear Water Repellant

a. Clear
   1st Coat: S-W ConFlex Water Repellant 7% Siloxane, CF31 Series
   2nd Coat: S-W ConFlex Water Repellant 7% Siloxane, CF31 Series
   (25-200 sq ft/gal)

b. Clear Solventborne
   1st Coat: S-W Loxon 40% Silane Water Repellent, LX31T Series
   2nd Coat: S-W Loxon 40% Silane Water Repellent, LX31T Series
   (25-175 sq ft/gal)

C. CONCRETE - (Concrete Floors, Patios, Porches, Steps & Platforms, (Non-Vehicular))

1. Acrylic Water-Based Systems

a. Gloss Finish
   1st Coat: S-W ConFlex Flexible Concrete Waterproofer, Smooth, CF14 Series
   2nd Coat: S-W ConFlex Flexible Concrete Waterproofer, Smooth, CF14 Series
   (10.0-12.0 mils wet per coat)
   3rd Coat: SW H&C Clarishield™ Water-Based Clear Sealer, Wet Look
   4th Coat: SW H&C Clarishield Water-Based Clear Sealer, Wet Look
   (200 sq/ft per gallon)

b. Satin Finish
   1st Coat: S-W Porch & Floor Enamel, A32 Series
   2nd Coat: S-W Porch & Floor Enamel, A32 Series
   (4.0 mils wet; 1.5 mils dry per coat)

c. Low Luster Finish
   1st Coat: S-W ConFlex Flexible Concrete Waterproofer, Smooth, CF14 Series
   2nd Coat: S-W ConFlex Flexible Concrete Waterproofer, Smooth, CF14 Series
   (10.0-12.0 mils wet per coat)
   3rd Coat: SW H&C UltraPaver™ Water-Based Paver Sealer, Natural or Gloss
   4th Coat: SW H&C UltraPaver Water-Based Paver Sealer, Natural or Gloss
   (100-150 sq ft/gal)

d. Flat Finish
   1st Coat: S-W ConFlex Flexible Concrete Waterproofer, Smooth, CF14 Series
   2nd Coat: S-W ConFlex Flexible Concrete Waterproofer, Smooth, CF14 Series
   (10.0-12.0 mils wet per coat)

2. Solid Color Stain

a. Low Luster Finish
   1st Coat: S-W H&C Acryla-Deck™ Water-Based Solid Color 100% Acrylic Deck Coating
   2nd Coat: S-W H&C Acryla-Deck Water-Based Solid Color 100% Acrylic Deck Coating
   (50-300 sq ft/gal)
D. METAL – (Aluminum/Galvanized)
1. Latex Systems
   a. Gloss Finish
      1st Coat: S-W A-100 Exterior Latex Gloss, A8 Series
      2nd Coat: S-W A-100 Exterior Latex Gloss, A8 Series
      (4.0 mils wet, 1.4 mils dry per coat)

   Early Moisture Resistant Finish
   1st Coat: S-W Resilience Latex Gloss, K44 Series
   2nd Coat: S-W Resilience Latex Gloss, K44 Series
   (4.0 mils wet, 1.6 mils dry per coat)

   b. Semi-Gloss Finish
      1st Coat: S-W Solo Acrylic Semi-Gloss, A76 Series
      2nd Coat: S-W Solo Acrylic Semi-Gloss, A76 Series
      (4.0 mils wet, 1.5 mils dry per coat)

   c. Satin Finish
      1st Coat: S-W A-100 Exterior Latex Satin, A82 Series
      2nd Coat: S-W A-100 Exterior Latex Satin, A82 Series
      (4.0 mils wet, 1.5 mils dry per coat)

   Early Moisture Resistant Finish
   1st Coat: S-W Resilience Latex Satin, K43 Series
   2nd Coat: S-W Resilience Latex Satin, K43 Series
   (4.0 mils wet, 1.6 mils dry per coat)

   d. Low Sheen Finish
      1st Coat: S-W A-100 Exterior Latex Low Sheen, A12 Series
      2nd Coat: S-W A-100 Exterior Latex Low Sheen, A12 Series
      (4.0 mils wet, 1.5 mils dry per coat)

   e. Flat Finish
      1st Coat: S-W A-100 Exterior Latex Flat, A6 Series
      2nd Coat: S-W A-100 Exterior Latex Flat, A6 Series
      (4.0 mils wet, 1.4 mils dry per coat)

   Early Moisture Resistant Finish
   1st Coat: S-W Resilience Latex Flat, K42 Series
   2nd Coat: S-W Resilience Latex Flat, K42 Series
   (4.0 mils wet, 1.6 mils dry per coat)
D. METAL – (Aluminum/Galvanized) (Cont.)
2. Alkyd Systems (Waterbased Urethane Modified Alkyd)
   a. Gloss Finish
      1st Coat: S-W Pro Industrial™ Pro-Cryl® Universal Primer, B66-1310 Series
               (5.0 mils wet, 1.9 mils dry)
      2nd Coat: S-W Emerald® Urethane Trim Enamel Gloss, K39-750 Series
      3rd Coat: S-W Emerald Urethane Trim Enamel Gloss, K39-750 Series
               (4.0 mils wet, 1.4 mils dry per coat)
   b. Semi-Gloss Finish
      1st Coat: S-W Pro Industrial Pro-Cryl Universal Primer, B66-1310 Series
               (5.0 mils wet, 1.9 mils dry)
      2nd Coat: S-W Emerald Urethane Trim Enamel Semi-Gloss, K38-750 Series
      3rd Coat: S-W Emerald Urethane Trim Enamel Semi-Gloss, K38-750 Series
               (4.0 mils wet, 1.4 mils dry per coat)
   c. Satin Finish
      1st Coat: S-W Pro Industrial Pro-Cryl Universal Primer, B66-1310 Series
               (5.0 mils wet, 1.9 mils dry)
      2nd Coat: S-W Emerald Urethane Trim Enamel Satin, K37-750 Series
      3rd Coat: S-W Emerald Urethane Trim Enamel Satin, K37-750 Series
               (4.0 mils wet, 1.4 mils dry per coat)

** NOTE TO SPECIFIER**
- For High Performance Metal Systems refer to 09 96 00
- Rusty galvanizing requires a minimum of Hand Tool Cleaning per SSPC-SP2, prime the area the same day as cleaned with Pro Industrial Pro-Cryl Universal Primer, B66-1300 Series
- For higher performance on bare ferrous and non-ferrous handrails and touch objects specify at minimum an epoxy primer followed by a Polyurethane finish.
E. METAL Ferrous - (Structural Steel, Beams, Miscellaneous & Ornamental Iron, Sashes, Doors, Partitions, Trim)

1. Latex Systems
   a. Gloss Finish
      1st Coat: S-W Pro Industrial Pro-Cryl Universal Primer, B66-1310 Series (5.0 mils wet, 2.0 mils dry)
      2nd Coat: S-W Solo Acrylic Gloss, A77 Series
      3rd Coat: S-W Solo Acrylic Gloss, A77 Series (4.0 mils wet, 1.6 mils dry per coat)
   b. Semi-Gloss Finish
      1st Coat: S-W Pro Industrial Pro-Cryl Universal Primer, B66-1310 Series (5.0 mils wet, 2.0 mils dry)

** NOTE TO SPECIFIER**

*Vinyl or other PVC Building Products
- Do not paint vinyl with any color darker than the original color.
- Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56 unless VinylSafe Colors are used.
- Painting with darker colors lower than an LRV of 56, or non VinylSafe Colors, may cause vinyl to warp.

2.4 MATERIALS - GENERAL REQUIREMENTS

A Paints and Coatings - General:
1 Unless otherwise indicated, provide factory-mixed coatings. When required, mix coatings to correct consistency in accordance with manufacturer's instructions before application. Do not reduce, thin, or dilute coatings or add materials to coatings unless such a procedure is specifically described in manufacturer's product instructions. VOCs need to be confirmed by using the products EDS sheets.

B Primers:
1 Where the manufacturer offers options on primers for a particular substrate, use primer categorized as "best" by the manufacturer.

2.5 ACCESSORIES:

A Coating Application Accessories:
1 Provide all primers, sealers, cleaning agents, cleaning cloths, sanding materials, and clean-up materials required per manufacturer’s specifications.

Part 3 EXECUTION

3.1 EXAMINATION

A Do not begin application of coatings until substrates have been properly examined and prepared. Notify Architect of unsatisfactory conditions before proceeding.

B If substrate preparation is the responsibility of another installer, notify Architect of unsatisfactory preparation before proceeding.

C Proceed with work only after conditions have been corrected, and approved by all parties, otherwise application of coatings will be considered as an acceptance of surface conditions.

D Previously Painted Surfaces: Verify that existing painted surfaces do not contain lead based paints, notify Architect immediately if lead based paints are encountered.

(Specifier Note: Verify the existence of lead based paints on the project. Buildings constructed after 1978 are less likely to contain lead based paints. If lead based paints are suspected on the project, all removal must be done in accordance with the EPA Renovation, Repair and Painting rule and all applicable state and local regulations. State and local regulations may be more strict than those set under the federal regulations. Verify that Owner has completed a Hazardous Material Assessment Report for the project prior to issuing of Drawings. Concluding that no lead based paints were found on project site, delete paragraph regarding lead based paints.)

3.2_SURFACE PREPARATION:

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority. Removal must be done in accordance with EPA Renovation, Repair and Painting Rule and all related state and local regulations. Care should be taken to follow all state and local regulations which may be more strict than those set under the federal RRP Rule.

A Proper product selection, surface preparation, and application affect coating performance. Coating integrity and service life will be reduced because of improperly prepared surfaces.
Selection and implementation of proper surface preparation ensures coating adhesion to the substrate and prolongs the service life of the coating system.

B Selection of the proper method of surface preparation depends on the substrate, the environment, and the expected service life of the coating system. Economics, surface contamination, and the effect on the substrate will also influence the selection of surface preparation methods.

C The surface must be dry and in sound condition. Remove oil, dust, dirt, loose rust, peeling paint or other contamination to ensure good adhesion. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

D Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

E No exterior painting should be done immediately after a rain, during foggy weather, when rain is predicted, or when the temperature is below 50°F, unless products are designed specifically for these conditions. On large expanses of metal siding, the air, surface and material temperatures must be 50°F or higher to use low temperature products.

F Methods:

1 Aluminum
   Remove all oil, grease, dirt, oxide and other foreign material by cleaning per SSPC-SP1, Solvent Cleaning.

2 Block (Cinder and Concrete)
   Remove all loose mortar and foreign material. Surface must be free of laitance, concrete dust, dirt, form release agents, moisture curing membranes, loose cement, and hardeners. Concrete and mortar must be cured at least 30 days at 75°F, unless the manufacturer’s products are designed for application prior to the 30-day period. The pH of the surface should be between 6 and 9, unless the products are designed to be used in high pH environments. On tilt-up and poured-in-place concrete, commercial detergents and abrasive blasting may be necessary to prepare the surface. Fill bug holes, air pockets, and other voids with a cement patching compound.

3 Concrete, SSPC-SP13 or NACE 6
   This standard gives requirements for surface preparation of concrete by mechanical, chemical, or thermal methods prior to the application of bonded protective coating or lining systems. The requirements of this standard are applicable to all types of cementitious surfaces including cast-in-place concrete floors and walls, precast slabs, masonry walls, and shotcrete surfaces. An acceptable prepared concrete surface should be free of contaminants, laitance, loosely adhering concrete, and dust, and should provide a sound, uniform substrate suitable for the application of protective coating or lining systems.

4 Cement Composition Siding/panels
   Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Pressure clean, if needed, with a minimum of 2100 psi pressure to remove all dirt, dust, grease, oil, loose particles, laitance, foreign material, and peeling or defective coatings. Allow the surface to dry thoroughly. The pH of the surface should be between 6 and 9, unless the products are designed to be used in high pH environments.
5 **Drywall—Exterior**

Must be clean and dry. All nail heads must be set and spackled. Joints must be taped and covered with a joint compound. Spackled nail heads and tape joints must be sanded smooth and all dust removed prior to painting. Exterior surfaces must be spackled with exterior grade compounds.

6 **Exterior Composition Board (Hardboard)**

Some composition boards may exude a waxy material that must be removed with a solvent prior to coating. Whether factory primed or unprimed, exterior composition board siding (hardboard) must be cleaned thoroughly and primed with an alkyd primer.

7 **Galvanized Metal**

Clean per SSPC-SP1 using detergent and water or a degreasing cleaner to remove greases and oils. Apply a test area, priming as required. Allow the coating to dry at least one week before testing. If adhesion is poor, Brush Blast per SSPC-SP16 is necessary to remove these treatments.

8 **Steel: Structural, Plate, etc.**

Should be cleaned by one or more of the surface preparations described below. These methods are used throughout the world for describing methods for cleaning structural steel. Visual standards are available through the Society of Protective Coatings. A brief description of these standards together with numbers by which they can be specified follow.

9 **Solvent Cleaning, SSPC-SP1**

Solvent cleaning is a method for removing all visible oil, grease, soil, drawing and cutting compounds, and other soluble contaminants. Solvent cleaning does not remove rust or mill scale. Change rags and cleaning solution frequently so that deposits of oil and grease are not spread over additional areas in the cleaning process. Be sure to allow adequate ventilation.

10 **Hand Tool Cleaning, SSPC-SP2**

Hand Tool Cleaning removes all loose mill scale, loose rust, and other detrimental foreign matter. It is not intended that adherent mill scale, rust, and paint be removed by this process. Before hand tool cleaning, remove visible oil, grease, soluble welding residues, and salts by the methods outlined in SSPC-SP1.

11 **Power Tool Cleaning, SSPC-SP3**

Power Tool Cleaning removes all loose mill scale, loose rust, and other detrimental foreign matter. It is not intended that adherent mill scale, rust, and paint be removed by this process. Before power tool cleaning, remove visible oil, grease, soluble welding residues, and salts by the methods outlined in SSPC-SP1.

12 **White Metal Blast Cleaning, SSPC-SP5 or NACE 1**

A White Metal Blast Cleaned surface, when viewed without magnification, shall be free of all visible oil, grease, dirt, dust, mill scale, rust, paint, oxides, corrosion products, and other foreign matter. Before blast cleaning, visible deposits of oil or grease shall be removed by any of the methods specified in SSPC-SP1 or other agreed upon methods.

13 **Commercial Blast Cleaning, SSPC-SP6 or NACE 3**

A Commercial Blast Cleaned surface, when viewed without magnification, shall be free of all visible oil, grease, dirt, dust, mill scale, rust, paint, oxides, corrosion products, and other foreign matter, except for staining. Staining shall be limited to no more than 33 percent of each square inch of surface area and may consist of light shadows, slight streaks, or minor discoloration caused by stains of rust, stains of mill scale, or stains of previously applied paint. Before blast cleaning, visible deposits of oil or grease shall be removed by any of the methods specified in SSPC-SP1 or other agreed upon methods.
14 Brush-Off Blast Cleaning, SSPC-SP7 or NACE 4
A Brush-Off Blast Cleaned surface, when viewed without magnification, shall be free of all visible oil, grease, dirt, dust, loose mill scale, loose rust, and loose paint. Tightly adherent mill scale, rust, and paint may remain on the surface. Before blast cleaning, visible deposits of oil or grease shall be removed by any of the methods specified in SSPC-SP 1 or other agreed upon methods.

15 Brush-Off Blast Cleaning of Coated and Uncoated Galvanized Steel, Stainless Steels, and Non-Ferrous Metals, SSPC-SP16
This standard covers the requirements for brush-off blast cleaning of uncoated or coated metal surfaces other than carbon steel by the use of abrasives. These requirements include visual verification of the end condition of the surface and materials and procedures necessary to achieve and verify the end condition. A brush-off blast cleaned non-ferrous metal surface, when viewed without magnification, shall be free of all visible oil, grease, dirt, dust, metal oxides (corrosion products), and other foreign matter. Intact, tightly adherent coating is permitted to remain. A coating is considered tightly adherent if it cannot be removed by lifting with a dull putty knife.

16 Power Tool Cleaning to Bare Metal, SSPC-SP11
Metallic surfaces that are prepared according to this specification, when viewed without magnification, shall be free of all visible oil, grease, dirt, dust, mill scale, rust, paint, oxide corrosion products, and other foreign matter. Slight residues of rust and paint may be left in the lower portions of pits if the original surface is pitted. Prior to power tool surface preparation, remove visible deposits of oil or grease by any of the methods specified in SSPC-SP1, Solvent Cleaning, or other agreed upon methods.

17 Near-White Blast Cleaning, SSPC-SP10 or NACE 2
A Near White Blast Cleaned surface, when viewed without magnification, shall be free of all visible oil, grease, dirt, dust, mill scale, rust, paint, oxides, corrosion products, and other foreign matter, except for staining. Staining shall be limited to no more than 5 percent of each square inch of surface area and may consist of light shadows, slight streaks, or minor discoloration caused by stains of rust, stains of mill scale, or stains of previously applied paint. Before blast cleaning, visible deposits of oil or grease shall be removed by any of the methods specified in SSPC-SP1 or other agreed upon methods.

18 Water Blasting, NACE Standard RP-01-72
Removal of oil grease dirt, loose rust, loose mill scale, and loose paint by water at pressures of 2,000 to 2,500 psi at a flow of 4 to 14 gallons per minute.

19 Stucco
Must be clean and free of any loose stucco. If recommended procedures for applying stucco are followed, and normal drying conditions prevail, the surface may be painted in 30 days. The pH of the surface should be between 6 and 9, unless the products are designed to be used in high pH environments such as Loxon.

20 Wood—Exterior
Must be clean and dry. Knots and pitch streaks must be scraped, sanded, and spot primed before a full priming coat is applied. Patch all nail holes and imperfections with a wood filler or putty and sand smooth.

21 Vinyl Siding, Architectural Plastics & Fiberglass
Vinyl or other PVC, plastic building products Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly, prime with appropriate white primer. Do not paint vinyl with any color darker than the original color. Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56 unless VinylSafe® Colors are used. If VinylSafe® Colors are not used and darker colors lower than an LRV of 56 are, the vinyl may warp. Follow all painting guidelines of the vinyl manufacturer when painting. Only paint properly
installed vinyl siding. Deviating from the manufacturer's painting guidelines may cause the warranty to be voided.

3.3 INSTALLATION

A Apply all coatings and materials with the manufacturer’s specifications in mind. Mix and thin coatings according to manufacturer’s recommendation.

B Do not apply to wet or damp surfaces.

1 Wait at least 30 days before applying to new concrete or masonry. Or follow manufacturer’s procedures to apply appropriate coatings prior to 30 days.
2 Test new concrete for moisture content.
3 Wait until wood is fully dry after rain or morning fog or dew.

C Apply coatings using methods recommended by manufacturer.

D Uniformly apply coatings without runs, drips, or sags, without brush marks, and with consistent sheen.

E Apply coatings at spreading rate required to achieve the manufacturer’s recommended dry film thickness.

F Regardless of number of coats specified, apply as many coats as necessary for complete hide.

G Exterior Woodwork: If final painting must be delayed more than 2 weeks after installation of woodwork, apply primer within 2 weeks and final coating within 2 weeks.

H Inspection: The coated surface must be inspected and approved by the Architect or Engineer just prior to the application of each coat.

3.4 PROTECTION

A Protect finished coatings from damage until completion of project.

B Touch-up damaged coatings after substantial completion, following manufacturer’s recommendation for touch up or repair of damaged coatings. Repair any defects that will hinder the performance of the coatings.

3.5 SCHEDULES

Specifer Note: Cut and paste the coatings system schedule here (specified in section 2.3 PAINT SCHEDULE), otherwise delete this section.
