Casino
Guide Specification

This Painting Schedule is furnished as a guide to select paint systems, and is not all-inclusive of available Sherwin-Williams products. Specifiers should review the contents and edit to suit the particular project and its location.

The schedule is arranged by substrates, and offers latex, acrylic, water-based epoxy, and water-based urethane. Each type also includes the available sheens.

Local and National V.O.C. (Volatile Organic Compound) regulations have been taken into consideration. However, because regulations vary by region and frequently change, specifiers should verify that the products comply with local rules. Consult with your Sherwin-Williams representative before finalizing the selection.

If you need additional product information, contact your Sherwin-Williams representative, refer to the Sherwin-Williams Painting Systems Catalog, visit sherwin-williams.com or call our Architectural Services Answer Team.

Casino Facility Interior Paint Schedule

Important Surface Preparation Instructions:

Verify the existence of lead based paints on the project. Buildings constructed after 1978 are less likely to contain lead based paints. If lead based paints are suspected on the project, all removal must be done in accordance with the EPA Renovation, Repair and Painting rule and all applicable state and local regulations. State and local regulations may be more strict than those set under the federal regulations. Verify that Owner has completed a Hazardous Material Assessment Report for the project prior to issuing of Drawings.

**WARNING!** Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority. Removal must be done in accordance with EPA Renovation, Repair and Painting Rule and all related state and local regulations. Care should be taken to follow all state and local regulations which may be more strict than those under the federal RRP Rule.

Specifier Notes — Topcoats:

- **ProMar® 400 Zero VOC Interior Latex** — A durable, professional quality zero VOC vinyl acrylic topcoat available in a Flat, Low Sheen, Eg-Shel, and Semi-Gloss finishes.

- **ProMar® 200 Zero VOC Interior Latex** — A durable, professional quality zero VOC vinyl acrylic topcoat available in a Flat, Low Sheen, Eg-Shel, and Semi-Gloss finishes.

- **Pro Industrial™ Pre-Catalyzed Waterbased Epoxy** — A single-component, waterbased acrylic epoxy that offers the durability and resistance to stains and most cleaning solvents usually characteristic of two-component waterbased epoxies. Available in Eg-Shel and Semi-Gloss finishes.

- **Pro Industrial™ Water Based Catalyzed Epoxy** — A two-component water based epoxy formulated to provide excellent corrosion resistance, chemical resistance, abrasion resistance, and moisture resistance. Available in Eg-Shel and Gloss finishes.

- **Pro Industrial™ Acrylic Coating** — A single-component, light industrial, 100% acrylic coating that flows and levels to a smooth finish. Available in Eg-Shel, Semi-Gloss, and Gloss finishes.

- **Faux Impressions® Specialty Finishes** — Water-based, these unique finishes feature subtle details not found with standard paint in order to maximize visual interest, create a dramatic environment and highlight special areas or focal points within the space.

**Recommended Finishes:**

Casino Facility Interior Paint Schedule

Miscellaneous Notes:

SURFACE PREPARATION:

A. Proper product selection, surface preparation, and application affect coating performance. Coating integrity and service life will be reduced because of improperly prepared surfaces. Selection and implementation of proper surface preparation ensures coating adhesion to the substrate and prolongs the service life of the coating system.

B. Selection of the proper method of surface preparation depends on the substrate, the environment, and the expected service life of the coating system. Economics, surface contamination, and the effect on the substrate will also influence the selection of surface preparation methods.

C. The surface must be dry and in sound condition. Remove oil, dust, dirt, loose rust, peeling paint or other contamination to ensure good adhesion.

D. Remove mildew before painting by washing with a solution of 1 part liquid household bleach and 3 parts of warm water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with clean water and allow the surface to dry 48 hours before painting. Wear protective glasses or goggles, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

E. Previously Coated Surfaces: maintenance painting will frequently not permit or require complete removal of all old coatings prior to repainting. However, all surface contamination such as oil, grease, loose paint, mill scale, dirt, foreign matter, rust, mold, mildew, mortar, efflorescence, and sealers must be removed to assure sound bonding to the tightly adhering old paint. Glossy surfaces of old paint films must be clean and dull before repainting. Thorough washing with an abrasive cleanser will clean and dull in one operation, or, wash thoroughly and dull by sanding. Spot prime any bare areas with an appropriate primer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system. Check for compatibility by applying a test patch of the recommended coating system, covering at least 2 to 3 square feet. Allow to dry one week before testing adhesion per ASTM D3359. If the coating system is incompatible, complete removal is required per ASTM D4259.

F. No exterior painting should be done immediately after a rain, during foggy weather, when rain is predicted, or when the temperature is below 50°F, unless products are designed specifically for these conditions. On large expanses of metal siding, the air, surface and material temperatures must be 50°F or higher to use low temperature products.

G. This schedule is not inclusive of all Sherwin-Williams products; other products and finishes are available.

H. Not all products are compliant nationwide, visit related websites for CARB, OTC, SCAQMD for current VOC regulations.
   - CARB — [http://www.arb.ca.gov/coatings/coatingsrules.htm](http://www.arb.ca.gov/coatings/coatingsrules.htm)
   - OTC — [www.otcair.org](http://www.otcair.org)

I. Product names, logos, brands and other trademarks are the property of their respective trademark holders.

J. Refer to the current MSDS/EDS for specific VOCs (calculated per 40 CFR 59.406). VOCs may vary by base and sheen.

K. Coating Maintenance Manual: upon conclusion of the project, the Contractor or paint manufacture/supplier shall furnish a coating maintenance manual, such as Sherwin-Williams “Custodian Project Color and Product Information” report or equal. Manual shall include an Area Summary with finish schedule, Area Detail designating where each product/color/finish was used, product data pages, Material Safety Data Sheets, care and cleaning instructions, touch-up procedures, and color samples of each color and finish used.

Indoor/Outdoor Pool:

Pool Deck — Waterproofing Deck Coating
Please contact your local Sherwin-Williams Sales Representative to evaluate the project for the most complete product recommendation.

CMU — Interior Walls in Pool Area & Chemical Storage
Eg-Shel or Gloss Finish
Filler coat: Heavy Duty Block Filler B42W46
1st coat: Pro Industrial™ Water Based Catalyzed Epoxy Eg-Shel, B73-360 Series or Gloss, B73-300 Series
2nd coat: Pro Industrial™ Water Based Catalyzed Epoxy Eg-Shel, B73-360 Series or Gloss, B73-300 Series

Gypsum Board — High Performance Finish for Walls & Ceilings
Gloss Finish
Primer: ProMar® 200 Zero VOC Interior Latex Primer, B28W2600
1st coat: Pro Industrial™ Water Based Catalyzed Epoxy Eg-Shel, B73-360 Series or Gloss, B73-300 Series
2nd coat: Pro Industrial™ Water Based Catalyzed Epoxy Eg-Shel, B73-360 Series or Gloss, B73-300 Series

Faux Impressions — Decorative Wall Finishes; Metallic and High-Polish Fresco (Venetian Plaster):

Faux Impressions Metallic Finish
Primer: ProMar® 200 Zero VOC Interior Latex Primer, B28W2600
1st coat: ProMar® 200 Zero VOC Interior Latex Eg-Shel B20-2600 Series
2nd coat: ProMar® 200 Zero VOC Interior Latex Eg-Shel B20-2600 Series
3rd coat: Faux Impressions® Metallic Glaze

Faux Impressions Metallic Finish
Primer: ProMar® 200 Zero VOC Interior Latex Primer, B28W2600
1st coat: ProMar® 200 Zero VOC Interior Latex Eg-Shel B20-2600 Series
2nd coat: ProMar® 200 Zero VOC Interior Latex Eg-Shel B20-2600 Series
3rd coat: Faux Impressions® Metallic Glaze
4th coat: Sher-Clear™ Acrylic Clear Coat High Gloss, B66C375

Faux Impressions High Polish Fresco (Venetian Plaster) Walls, Gypsum Board (Level 5 Drywall Finish required)
1st coat: ProMar® 200 Zero VOC Interior Latex Primer, B28W2600
2nd coat: Faux Impressions® Venetian Plaster
3rd coat: Faux Impressions® Venetian Plaster
4th coat: Faux Impressions® Venetian Plaster
Concrete Floors — Pigmented Coating Systems:

Light Duty (Foot Traffic)
1st coat: ArmorSeal® Tread-Plex™
2nd coat: ArmorSeal® Tread-Plex™

Medium/Heavy Duty (Kitchen Areas, Food Service, Restrooms, Labs, Corridors)

Gloss Finish
1st coat: ArmorSeal® 8100 Finish B70-8100 Series
2nd coat: ArmorSeal® 8100 Finish B70-8100 Series

Satin Finish
1st coat: ArmorSeal® 8100 Finish B70-8160 Series
2nd coat: ArmorSeal® 8100 Finish B70-8160 Series

Concrete Floors — Decorative Coating Systems:

Sherwin-Williams, offers a full line of patching materials, basecoats and high-performance floor finishes. Sherwin-Williams has a coating solution for most surfaces.

Please contact your local Sherwin-Williams representative for detailed information and specifications.
Specifier Notes — Topcoats:

a. **A-100® Exterior Latex** — A 100% acrylic formula that offers a durable, professional quality coating available in a Flat, Satin, Low-Sheen, and Gloss finishes.

b. **Loxon XP™ Masonry Coating** — Provides flexibility, durability, and weather resistance. This product will protect against wind-driven rain when used on tilt-up, precast, or poured-in-place concrete, CMU, and stucco. This may be applied to a surface with a pH of 6 to 13.

c. **Water Based Acrolon™ 100 Urethane** — A two-component, water based, acrylic urethane enamel. It is designed for high performance protection with outstanding exterior gloss and color retention properties.

d. **Pro Industrial™ Acrylic Coating** — A single-component, light industrial, 100% acrylic coating that flows and levels to a smooth finish. Available in an Egg-Shel, Semi-Gloss, and Gloss finishes.

e. **UltraCrete Textured Masonry Topcoat** — A 100% acrylic aggregate filled coating used to produce a textured finish on exterior surfaces.

Recommended Finishes:

Body: Flat or Satin (unless otherwise noted)

Trim: Semi-Gloss or Gloss Finish (unless otherwise noted)
Concrete and Masonry Vertical Surfaces — Smooth:

**Gloss Finish**
- Primer: Loxon® Concrete & Masonry Primer Sealer, A24W8300
- 1st coat: A-100® Exterior Latex Gloss, A8 Series
- 2nd coat: A-100® Exterior Latex Gloss, A8 Series

**Satin Finish**
- Primer: Loxon® Concrete & Masonry Primer Sealer, A24W8300
- 1st coat: A-100® Exterior Latex Satin, A82 Series
- 2nd coat: A-100® Exterior Latex Satin, A82 Series

**Low-Sheen Finish**
- Primer: Loxon® Concrete & Masonry Primer Sealer, A24W8300
- 1st coat: A-100® Exterior Latex Low Sheen, A12 Series
- 2nd coat: A-100® Exterior Latex Low Sheen, A12 Series

**Flat Finish**
- Primer: Loxon® Concrete & Masonry Primer Sealer, A24W8300
- 1st coat: A-100® Exterior Latex Flat, A6 Series
- 2nd coat: A-100® Exterior Latex Flat, A6 Series

**Flat Finish — High Build Coating**
- 1st coat: Loxon XP™ Masonry Coating, A24-1400 Series
- 2nd coat: Loxon XP™ Masonry Coating, A24-1400 Series

**Textured Finish**
- Primer: Loxon® Concrete & Masonry Primer Sealer, A24W8300
- 1st coat: Ultracrete Textured Masonry Topcoat Fine, Medium, Extra Coarse, A44-800 Series
- 2nd coat: Ultracrete Textured Masonry Topcoat Fine, Medium, Extra Coarse, A44-800 Series

Plaster/Stucco/EIFS:

**Gloss Finish**
- Primer: Loxon® Concrete & Masonry Primer Sealer, A24W8300
- 1st coat: A-100® Exterior Latex Gloss, A8 Series
- 2nd coat: A-100® Exterior Latex Gloss, A8 Series

**Satin Finish**
- Primer: Loxon® Concrete & Masonry Primer Sealer, A24W8300
- 1st coat: A-100® Exterior Latex Satin, A82 Series
- 2nd coat: A-100® Exterior Latex Satin, A82 Series

**Low-Sheen Finish**
- Primer: Loxon® Concrete & Masonry Primer Sealer, A24W8300
- 1st coat: A-100® Exterior Latex Low Sheen, A12 Series
- 2nd coat: A-100® Exterior Latex Low Sheen, A12 Series

**Flat Finish**
- Primer: Loxon® Concrete & Masonry Primer Sealer, A24W8300
- 1st coat: A-100® Exterior Latex Flat, A6 Series
- 2nd coat: A-100® Exterior Latex Flat, A6 Series

**Flat Finish — High Build Coating**
- 1st coat: Loxon XP™ Masonry Coating, A24-1400 Series
- 2nd coat: Loxon XP™ Masonry Coating, A24-1400 Series
Wood:

Satin Finish
Primer: Exterior Latex Wood Primer, B42W8041
1st coat: A-100® Exterior Latex Satin, A82 Series
2nd coat: A-100® Exterior Latex Satin, A82 Series

Low-Sheen Finish
Primer: Exterior Latex Wood Primer, B42W8041
1st coat: A-100® Exterior Latex Low Sheen, A12 Series
2nd coat: A-100® Exterior Latex Low Sheen, A12 Series

Ferrous Metals:

Gloss — High Performance Finish (Areas where performance is critical such as railings, canopies, handrails, etc.)
Primer: Pro Industrial™ Pro-Cryl® Universal Primer, B66-310 Series
1st coat: Water Based Acrolon™ 100 Polyurethane Gloss, B65-700 Series
2nd coat: Water Based Acrolon™ 100 Polyurethane Gloss, B65-700 Series

Semi-Gloss Finish
Primer: Pro Industrial™ Pro-Cryl® Universal Primer, B66-310 Series
1st coat: Pro Industrial™ Acrylic Semi-Gloss, B66-650 Series
2nd coat: Pro Industrial™ Acrylic Semi-Gloss, B66-650 Series

Non-Ferrous Metals:

Gloss — High Performance Finish (Areas where performance is critical such as railings, canopies, handrails, etc.)
Primer: Pro Industrial™ Pro-Cryl® Universal Primer, B66-310 Series
1st coat: Water Based Acrolon™ 100 Polyurethane Gloss, B65-720 Series
2nd coat: Water Based Acrolon™ 100 Polyurethane Gloss, B65-720 Series

Semi-Gloss Finish
Primer: Pro Industrial™ Pro-Cryl® Universal Primer, B66-310 Series
1st coat: Pro Industrial™ Acrylic Semi-Gloss, B66-650 Series
2nd coat: Pro Industrial™ Acrylic Semi-Gloss, B66-650 Series

Balcony:

Concrete Deck — Balcony Floors
Flat Finish
1st coat: Sher-Crete® Flexible Concrete Waterproofer, A5 Series
2nd coat: Sher-Crete® Flexible Concrete Waterproofer, A5 Series

Non-Ferrous Metal — Railing
Gloss Finish
Primer: Pro Industrial™ Pro-Cryl® Universal Primer, B66-310 Series
1st coat: Water Based Acrolon™ 100 Polyurethane Gloss, B65-720 Series
2nd coat: Water Based Acrolon™ 100 Polyurethane Gloss, B65-720 Series
