Subject: Project 18770-030AA - Test Results

Thank you for choosing UL Environment, and its ISO/IEC 17025 accredited testing laboratory, for your analytical needs. The Sherwin-Williams Company’s “EC2947MV Pro Industrial Waterborne Dryfall Egv-Shel” was tested by our laboratory for low emitting materials.

Testing was conducted in small environmental chambers following the principles of ASTM D 5116 with the defined product specific test protocols and IAQ emission requirements of the State of California’s Indoor Air Quality Program, “Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources using Environmental Chambers” (aka CA Section 01350).

Calculations were performed using the parameters below to estimate the concentrations of VOCs of concern for use in a classroom and in an office environment.

<td>0.68 air changes per hour (ACH)</td>
<td>3.66 m x 3.05 m x 2.74 m = 30.6 m³ (12 x 10 x 9 ft = 1,080 ft³)</td>
<td>33.4 m²</td>

The product mentioned above as received and tested meets the Section 1350 requirements for use in a classroom and in an office with the above parameters.

If you have any questions or concerns about the test results, please contact your Account Manager at (888) 485-4733.

Sincerely,

Allyson M. McFry
